CHOICE

ECO CLEAN

Eco Clean is an environmentally friendly medium made entirely of recycled materials that has a triple longer lifespan than standard silica sand. In beside saving you money, this product will make your pool cleaner and healthier.

Benefits:

Filtering ability: Filters pool water up to 3 micron

Saves: Pressure loss, electricity and water

Maintenance Cost: No need to change every year

Composition:

SiO₂: 72.32% Na₂O: 14.31

Al₂O₃: 2.4 K₂O: 1.2%

CaO: 7.51% MgO: 1.35%

Fe₂O₃: 0.061%

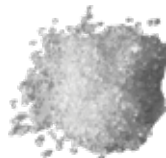

- Saves up to 40% water with quick backwashing
- It Increases filtration capacity, longer intervals between backwashing
- Filters down to 3 microns, producing crystal clear water.
- Reduces bacterial growth in filters and saves on chemical usage.
- Allows for increased flow, which improves filtration.

ECO CLEAN GLASS MEDIA COARSE (1.5-3.0mm)

ECO CLEAN glass media coarse 25kg for pool filters, longer life, superior backwash & filtration compared to sand/silicon media

ECO CLEAN GLASS MEDIA FINE (0.5-0.8mm)

ECO CLEAN glass media fine 25kg for pool filters, longer life, superior backwash & filtration compared to sand/silicon media
